EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with James R. Crawford on 6/21/05.

The application has been amended as follows: In claim 27, line 4, after (b), insert “; wherein the sustained release form provides sustained release for at least about 8 hours.”

2. The following is an examiner's statement of reasons for allowance: The claims are drawn to a sustained release formulation which releases for about at least 8 hours and comprises a cationogenic chitosan, an alpha lipoic acid and a secondary acid. This unique combination not found in the art provides an improved and unexpected release for the alpha lipoic acid compound. This release improves the bioavailability of the formulation and its overall effectiveness. Further the interaction of the cationic polymer and the anionic lipoic acid is required for this release. In order to achieve this release the alpha lipoic acid must first interact with an acid component before interacting with the polymer in order to ensure a hydration of the compound. The matrices of the prior art do not allow for this interaction and would result in insufficient release. The Richardson reference discloses an alpha lipoic formulation, but does not disclose the interaction between the second acid and a hydration step that leads to an improved release. For these reasons at least the claims are novel over the prior art.
